

# **CSM Priorities and Workplan 2016**

CSM Information Meeting

1 February 2016

# CSM Priorities in 2016

## Priorities:

1. CSM Work on CFS Processes in 2016
2. CSM engagement with future CFS agenda
3. Strengthening constituencies and interaction within CSM
4. Capacity building, internal learning processes and strategy development

## 1. CSM Work on CFS Processes in 2016

### Themes/issues

▪ Nutrition

- Task Team participation
- OEWG participation
- Inputs HLPE report

▪ SDG

- Task Team participation
- OEWG participation

▪ Smallholders to markets

- Task Team participation
- OEWG participation

▪ Monitoring

- Contributions to framing the terms for monitoring events and the global thematic monitoring session on VGGT application
- OEWG participation

## 1. CSM Work on CFS

### Processes in 2016

#### Themes/issues

#### Activity Lines

- Sustainable ag. development, including livestock  Contributions to HLPE Report  
Participation in Negotiation CFS  
Decision Box 43
- Urbanization + rural transformation  Contributions to the preparation  
process of the HLF during CFS 43
- GSF  Contribution to the process towards a  
periodic update of the GSF
- CFS Evaluation  Contributions to CFS evaluation process
- CFS Budget and Agenda CFS 43  Contributions to CFS Bureau/AG  
meetings

## 2. CSM engagement with future CFS agenda

- Vision for the CFS  The CSM will contribute to articulate a vision for the CFS as the foremost inclusive and human rights based intergovernmental and international platform for food security and nutrition.
- Strategic Plan for the CSM  In the same context, the CSM will formulate in 2016 a draft strategic plan for 2017 onwards

## 2. CSM engagement with the future CFS agenda

- Implementation and Monitoring of CFS Decisions  Special attention to the implementation and monitoring of CFS decisions at the country, regional and global level, including VGGT, FFA for Protracted Crises, and Water Decision Box of CFS 42
- MYPoW 2018-2019  Contributions to OEWG process. CSM will recall its suggestions to include Agroecology, and Genetic Resources as priority themes for the CFS.

### **3. Strengthening constituencies and interaction within CSM**

Facilitating the input from 11 global constituencies and 17 sub-regions into Civil Society articulation processes towards the CFS puts a set of complex challenges.

In that sense the CSM Workplan 2016 foresees:

- Support to facilitation for constituencies and sub-regions
- Support to CSO for the use and monitoring of CFS decisions
- 2 Coordination Committee meetings in 2016
- Support to 1 global constituency and 1 regional meeting
- Assessment and revision of CSM Working Groups

## 4. Capacity building, internal learning processes and strategy development

- Capacity building and internal learning, including through:
  - documenting the key positions of civil society organizations in different CFS processes.
  - elaborating a capacity building and internal learning strategy
- Strengthening internal and external communication
- Strengthening and further development of advocacy strategies, including the capacity building for newcomers and CSO negotiators
- Addressing the financial uncertainties through a mid-term funding strategy for the CSM
