### **Description:**

The objectives of this side-event are to:

- 1) Briefly highlight key elements of the ToR and to encourage CFS members and participants to organise monitoring events in the future;
- 2) To enrich the discussions on VGGT by presenting key insights of an independent report on their use and application from the perspective of CSOs, particularly of the most marginalised constituencies; and
- 3) To explain the challenges ahead and how they might be overcome, regarding implementation and monitoring of other CFS decisions included in the Global Strategic Framework for Food Security and Nutrition (GSF) or negotiated outcomes such as the Framework for Action for Food Security and Nutrition in Protracted Crises.
