

THE FUTURE SHAPE OF THE FOOD CHAIN

Update on Agribusiness Mega-Mergers and Food Security
CSM and ETC Group Webinar for Delegates from Permanent
Representations to the UN in Rome and Staff of RBAs

Last year at CFS 43, we alerted delegates to the three mega-mergers taking place in the agricultural input sector: Dow-Dupont, ChemChina-Syngenta and Bayer-Monsanto.

The increased consolidation in the US\$97 billion commercial seeds and agrochemical market is part of a larger trend of consolidation all along the Food Chain.

This Webinar will provide updates and foresight on ongoing corporate mergers and acquisitions all along the Food Chain, from giant seed and agrochemical companies to a handful of even bigger fertilizer and farm machinery companies. It will answer the questions:

**Where will these mergers end up?
Who will control the Food Chain?
What does this mean for Food Security?**

60-minute WEBINAR to be led by Pat Mooney, Neth Daño and Joana Chelo of ETC Group. Sufficient time will be provided for discussions and exchange of views.
