Description:

The growing landlessness is a root cause of food insecurity, inequality, disparity, injustice and violence which together can be seen as one of the biggest challenge for humanity today. Representatives of landless movements from Asia, Near East, Africa and Latin America will describe the dimensions of landlessness, their causes and effects, and will present their political demands towards the international community, and particularly the CFS. The global hearing of the landless will provide a unique moment to learn from representatives of landless movements about their realities and struggles on the ground, and to hear from them what their urgent political proposals are on the national, regional and global levels. The Sustainable Development Goals, and particularly those related to food security and nutrition, cannot be achieved without effectively addressing the core concerns of the landless. The Global Hearing of the Landless aims to be a step of hope and struggle into this direction.
