# Learning about the COVID-19 crisis in the Committee on World Food Security

---

Thursday 16 April 2020  
15:00 - 17:00 h (CET)

## Panelists:

**Máximo Torero** - Assistant DG, Economic and Social Development, FAO

**Francesco Branca** - Director Nutrition and Development, WHO

**Olivia Yambi** - Co-Chair IPES-Food

**G.V. Ramanjaneyulu** - Executive Director, Center for Sustainable Agriculture

**Sophia Murphy** - Senior Specialist, Agriculture, Trade, Investment, IISD

**Mamadou Goita** - Executive Director, IRPAD

*Co-facilitators: **Nettie Wiebe** and **Ruchi Tripathi** (CSM)*

The Webinar will take place on Zoom at the following link  
[linkhttps://zoom.us/j/95560219878](https://zoom.us/j/95560219878) - Meeting ID: 955 6021 9878

EN/ES/FR Interpretation will be provided. If you are planning to attend through ES/FR interpretation  
please write to [cso4cfs@gmail.com](mailto:cso4cfs@gmail.com) \*(see next page for instructions)

## Abstract

It is increasingly evident that the tremendous impacts of the COVID19 pandemic on human health will be accompanied by a **food crisis of global dimensions** in which food import-dependent countries and vulnerable sectors of the population will be the hardest hit.

CFS members and participants are already engaged in monitoring and assessing the impacts of COVID19 and tracking responses at all levels.

The CFS can count on its own High-Level Panel of Experts and, importantly, on the data collection and knowledge generating activities of the RBAs, FAO in particular. At the same time, through the **multiple constituencies that comprise it**, the CFS has unprecedented access to the evidence and proposals of the most vulnerable, who are also responsible for the bulk of food production in the world. **Putting these insights and perceptions together can help us to learn lessons regarding what makes food systems resilient and what normative process needs to be engaged** to work towards inclusive, equitable and sustainable food systems.

## Interpretation

FR/ES/EN interpretation will be available directly in the zoom call. If, for some reason, the interpretation function on your zoom toolbar is not working please use this links to access the interpretation booths on Skype:
